

PLSS CadNSDI Data Set Availability

**March 2018**

The table below provides a link to the zipped file geodatabase containing the PLSS CadNSDI for the state and if available, the link to the data steward where the PLSS CadNSDI is available. Users should always check with the data steward for any updates to the dataset. The files hosted at national cad indicate the vintage, which is the date in the zipped file name, is the date the data set was last updated. Other sites may not follow this convention and are the responsibility of the data steward.

These files are rather large and may take a few minutes to download.

Please contact the identified data steward with questions or comments on data set contact. In most cases the “local” data set” previously hosted here is now available through the BLM Navigator.

Here is BLM’s PLSS Map Service:
